

Common Tasks in PBWorks

Editing Pages

1. Click “Edit” in the top left corner of the page you wish to edit.

2. This will take you to an editable version of the same screen. Much of the text and pre-existing elements of the page will be contained in fields for you to edit. Other elements, such as the title can be edited once you click on them specifically.

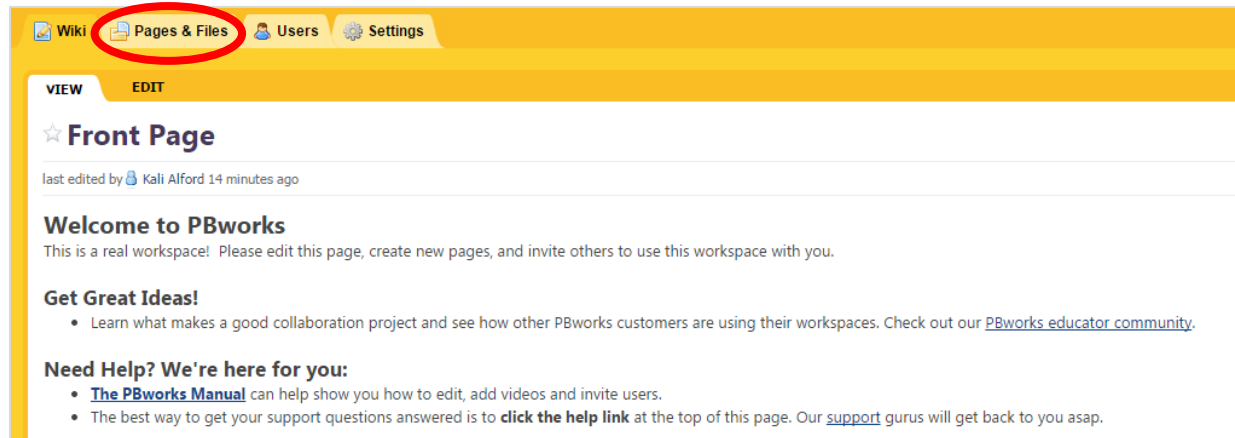

3. As you are making the edits to your page, you can click  to save your progress if you want to take a break or go away from the page. If you are finished making your edits, click  to return to the page that your students will see when they visit the page.

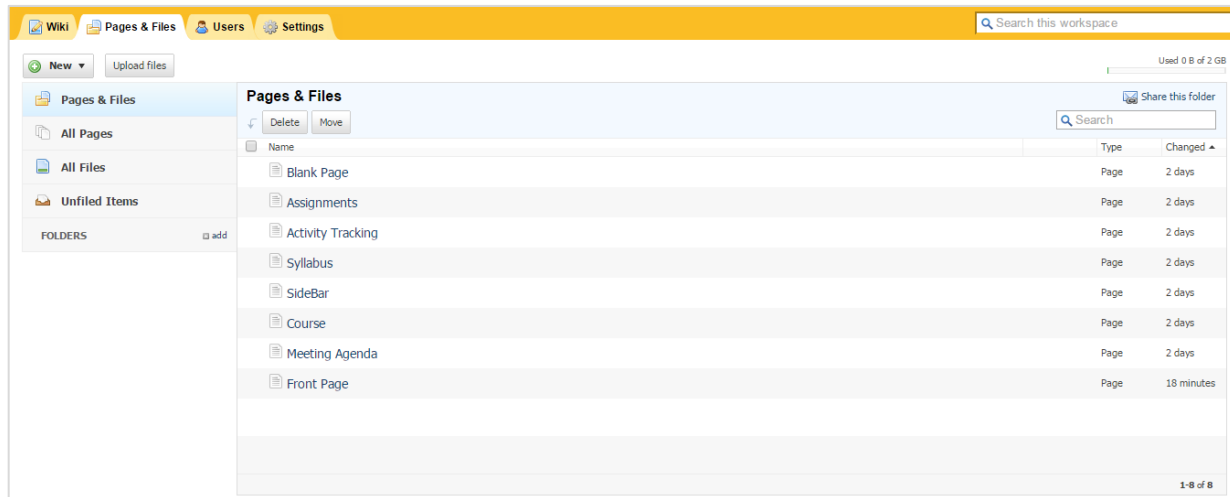

Note: If you are collaborating on this workspace with a colleague, it may be a good idea to describe the edits you made in the text field below the two buttons on the edit screen. If you want to undo the edits, click  then click the  button next to the edits you made.

Deleting Pages, Adding Pages, & Uploading Files

1. Click the “Pages and Files” tab in the top left corner of the main page.

2. From this page you have the option of deleting or adding pages .

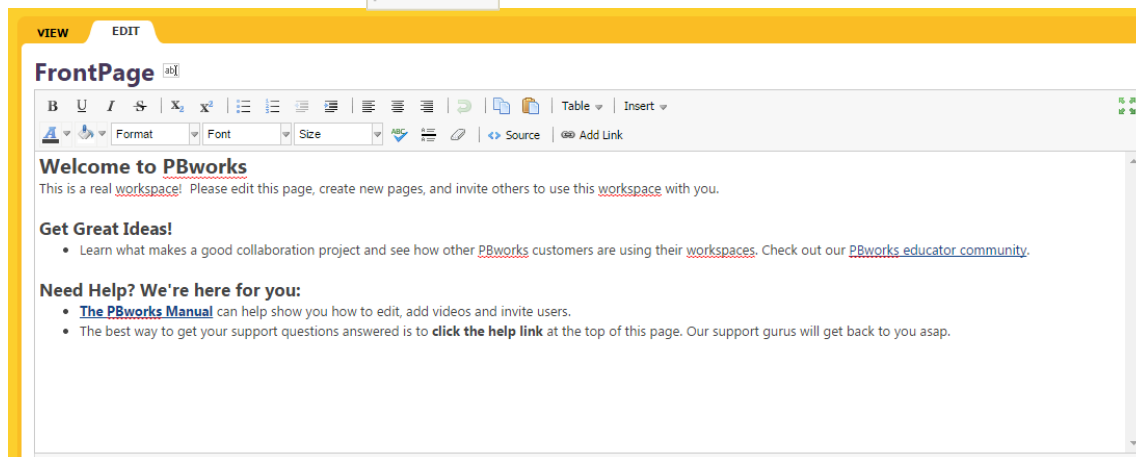

3. To delete pages, select the page(s) and click  . To add pages, click  . A box will appear asking you to name your new page. To upload files, click  . Because your campus account limits you to 40GB of storage, you should be mindful of the files you upload since some types of files can be large and consume much of your storage space.

Adding Elements

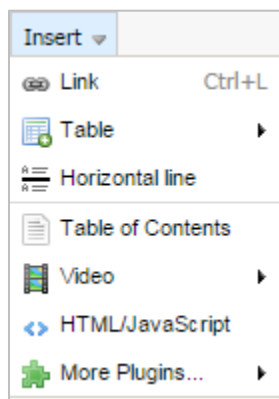

1. Click “Edit” in the top left corner of the page you wish to add elements to.

2. On the editable page that will come up, you have several ways of adding elements. The simplest way is to click **Insert** at the top of the screen.

3. The drop down menu that appears has a variety of features. For our purposes we'll work through the link and video elements.

4. By clicking the  button a pop up screen will open in the main text field of the screen. Depending on whether the hyperlink you are creating is to a page within your wiki, another website, or a file that you have saved within your account, you will either put the title of the page/document or URL in this field. Once you have entered the information into the field a hyperlink will be added into the main text field on the page.

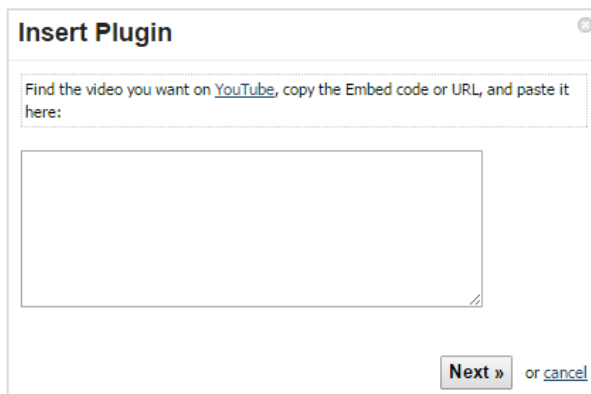

Note: If you already have text in the main field and you want a word or words to be a hyperlink, highlight the word(s) and click  on the main menu. Insert the title of the page/document or URL in this field and the highlighted word(s) will become the hyperlink.

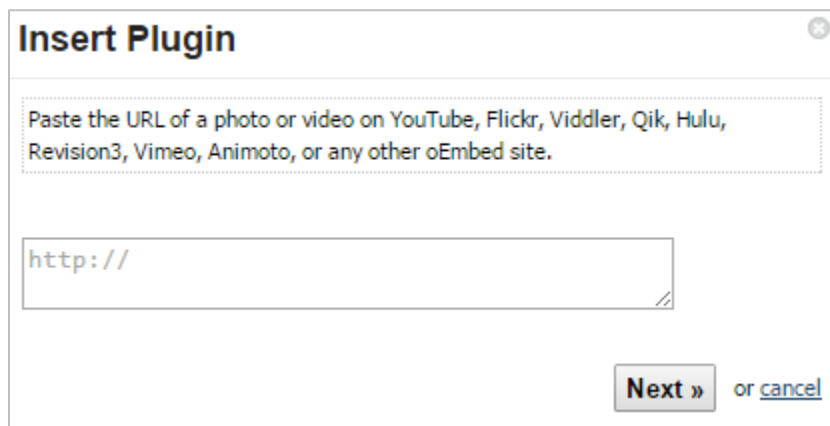

5. By hovering over the  button, a submenu will appear with a few more options for adding video.

6. Clicking  will open a pop up menu. Enter the URL of the YouTube video you want to add in the field. A plugin box will be added to the main text field. If you want to align the plug in box, click it and then click the desired alignment on the main menu.

7. If the video you want to add is not on Youtube, click . A box will appear giving you the option to enter URLs from several other specific video hosting websites. Other popular sites not listed, including *DailyMotion*, may also work.

8. The last option, , should be chosen if you want to upload a video directly to PBworks. This option is available once your account is added to the KSU campus account. Because your campus account limits you to 40GB of storage, you should be mindful of the videos you upload since many video files can be large.

Note: Video plugins cannot be viewed from the edit screen. A plugin box will appear in its place until you save the page and return to the viewing tab of the page.
