

Downloading SeaMonkey in Chrome

1. Go to www.seamonkey-project.org, and in the green box it should say your operating system and language. If this is correct, click the link. If it says something different, click “Other Systems & Languages” and find your respective language and OS.

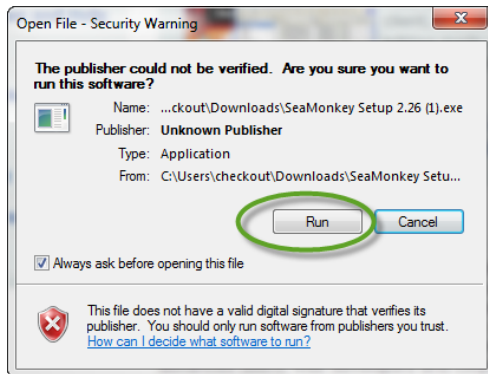

2. An icon will appear and load in the bottom left side of your browser window. When it is done loading, click it.

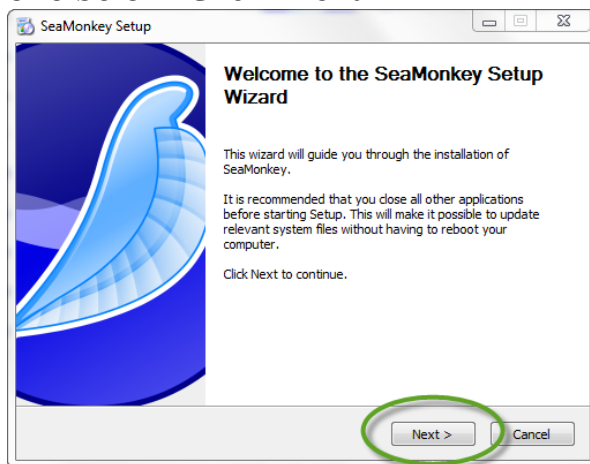

3. On Mac, a window will show up that looks like the one below. Click and drag the SeaMonkey icon into the Applications folder, then exit the window.

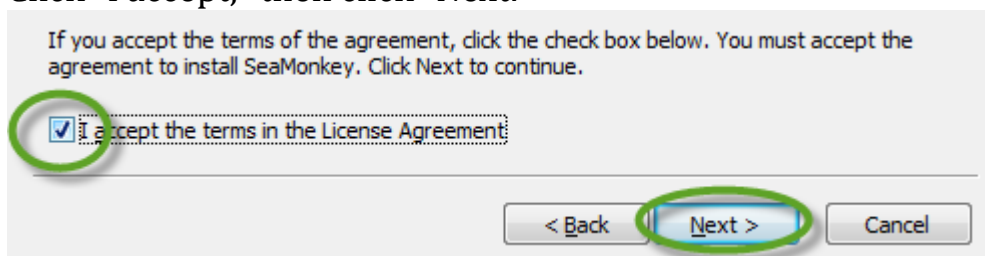

On Windows, you will get a window that looks like the one below. Click “Run.”

When it is done loading, you will get a window that looks like the one below. Click “Next.”

Click “I accept,” then click “Next.”

Click “Next” again, then click “Install. When it has finished loading, click “Finish.” You can now move on to the SeaMonkey for (Mac or PC) instructions.
