

Embedding Videos from YouTube into Your Discussion Post

1. To embed your YouTube video into the discussion board on D2L, you first need to get the embed code from your YouTube video.

Go to your YouTube video and open up your video. Click on the “Share” button.

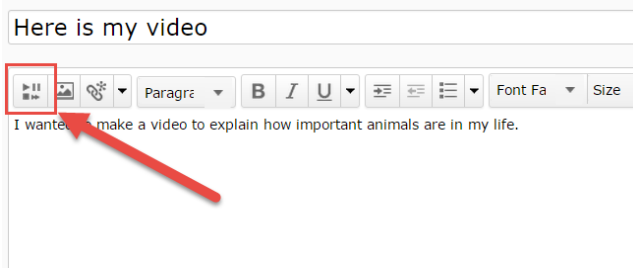

2. You will see options pop up. Click on the “Embed” button. You will see a code pop up. Right click on it, and choose “copy.” If you are on a Mac, click in the box and choose Command+C.

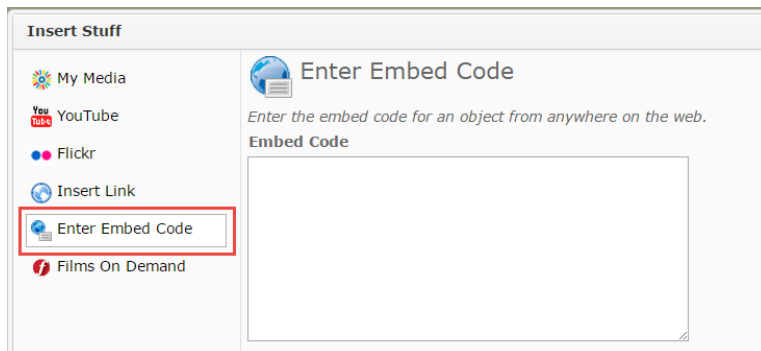

3. Next, go to your course in D2L and click on the discussion thread where you wish to post your YouTube video.

4. Enter the subject of your discussion post.

5. If you wish, introduce your video or explain to your audience what you want them to understand before they watch it. Then, choose the “insert stuff” button.

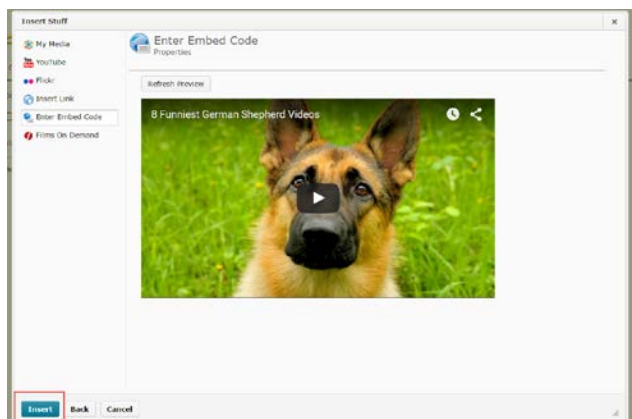

6. Under “Insert Stuff,” choose “Enter Embed Code.”

7. The embed code box will pop up. Right click in the box and choose “paste.” If you are on a Mac, click into the box and choose Command+V. Your embed code will paste into the box.

8. Click on “Next” at the bottom.

9. If a button shows up that says “Refresh Preview,” click on it. Then click on “Insert.”

10. Your video is now embedded.
