

Getting Results from your Kahoot

Note: This tutorial assumes you have created and played your Kahoot. If you have not, please refer to the tutorials on creating your Kahoot and launching and playing it.

1. Click “Feedback and Results” under the section where the winner is announced. This will take you to a feedback screen where students can rate your quiz as well as leave feedback on their performance.

2. Clicking “Final Results” will open a screen where you can download a spreadsheet that contains a performance breakdown of your quiz’s participants.
