

Creating and Sharing a Films On Demand Playlist

1. Navigate to Films on Demand in your browser.

<http://proxy.kennesaw.edu/login?url=http://digital.films.com/portalPlaylists.aspx?aid=6581>

2. Search for the first video you want to place in a playlist by typing in the search bar.

Harry Potter

6. You can either create a new playlist or add the video to an existing playlist.
- To create a new playlist, type a name for your playlist next to “New Playlist,” then click “New Playlist.”

Harry Potter Playlist

New Playlist

- To add it to an existing playlist, select the playlist from the dropdown next to “Add to Playlist,” then click “Add to Playlist.”

Test Playlist

Add To Playlist

7. Repeat steps 2-6 as needed until all of your videos are in the playlist.
8. When you are ready to access your playlist, click your name in the top right corner, then click “My Films.”

9. Under “My Content,” click “My Playlists.”

My Content

-  **My Playlists (1)**
Playlists contain audio and video
-  **My Favorites (0)**
Bookmark your favorite content
-  **My Folders (1)**
Manage your universal folders and their content

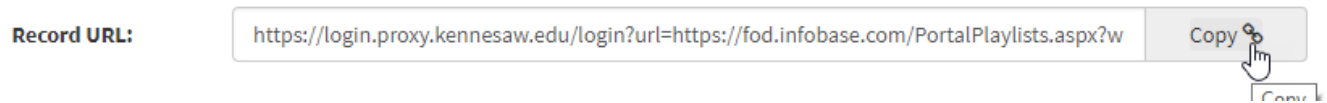

-  **My Saved Searches (0)**
Save frequent search queries for quick access
-  **My Custom Segments (0)**
Access and manage your custom segments

10. Next to your playlist, click “Embed/Link.”

The screenshot shows a playlist item with a thumbnail image of a black mask. To the right of the thumbnail, the text reads "Test Playlist | 3 Items" and "Created on 03/30/2018". Below this, there are several action buttons: "Edit", "Share", "Embed/Link", and "Delete". A black callout box highlights the "Embed or Direct Link" button, and a mouse cursor is pointing at it.

11. Copy the “Record URL.” You can paste that link into D2L.

The screenshot shows a text input field labeled "Record URL:" containing the URL "https://login.proxy.kennesaw.edu/login?url=https://fod.infobase.com/PortalPlaylists.aspx?w". To the right of the input field is a "Copy" button with a copy icon. A mouse cursor is clicking the "Copy" button.
