

How to Create a Smore

*This tutorial assumes that you have already created a Smore account. If you have not done so, please refer back to the Creating a Smore Account tutorial.

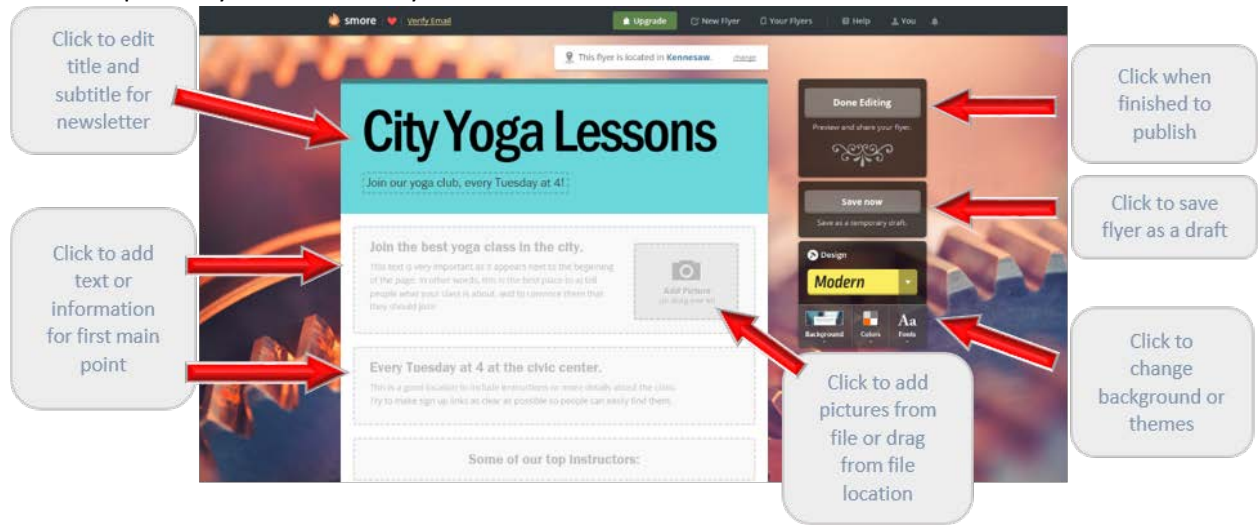

1. After you have created a [Smore](#) account and logged in, you should be brought to your dashboard page. Click the “Start a new flyer” button to begin creating your Smore.

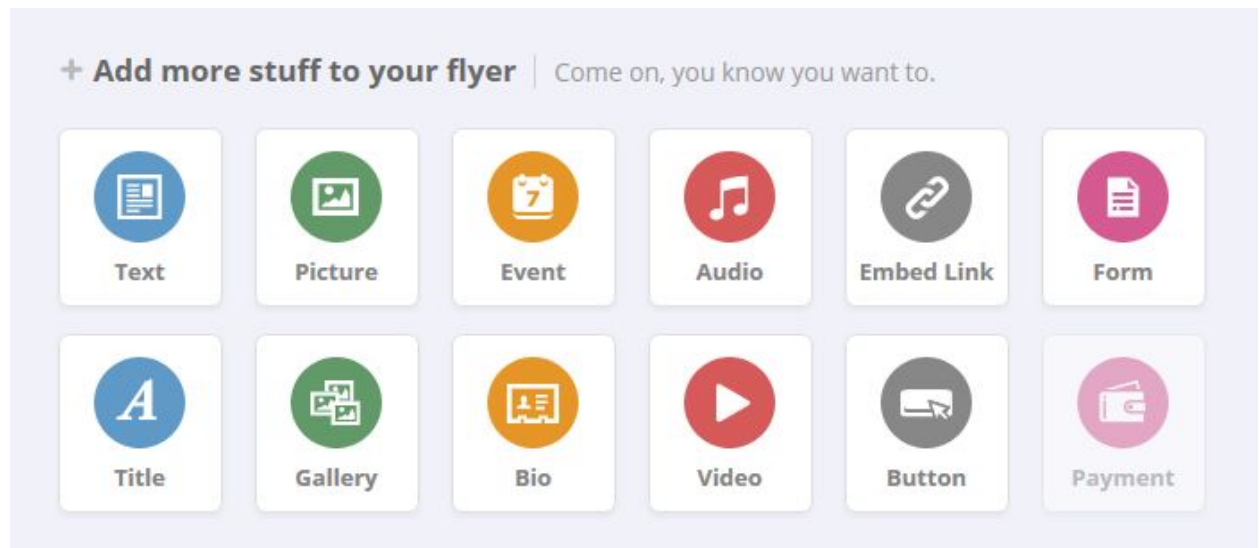

2. Smore then gives you the option of different formats or templates to use on your newsletter. For our purposes, let's click the “Class” tile.

3. The basic features of a Smore newsletter are outlined in the illustration below. Basic features are very similar to other web tools in that you can add text and images, format text and designs, and then publish your work once you are finished.

4. In addition to Smore's basic features, if you scroll down to the bottom of the edit screen you will see the available advanced features that increase its value as a communication tool.

Most of the features above are included in the free version. However, some of the features are expanded to do more within the paid versions. If you are thinking of using Smore for a specific task it may be a good idea to look into what all is offered within the paid versions. If not, I think you will find the free version more than suitable.
