

# Making an EDpuzzle lesson

---

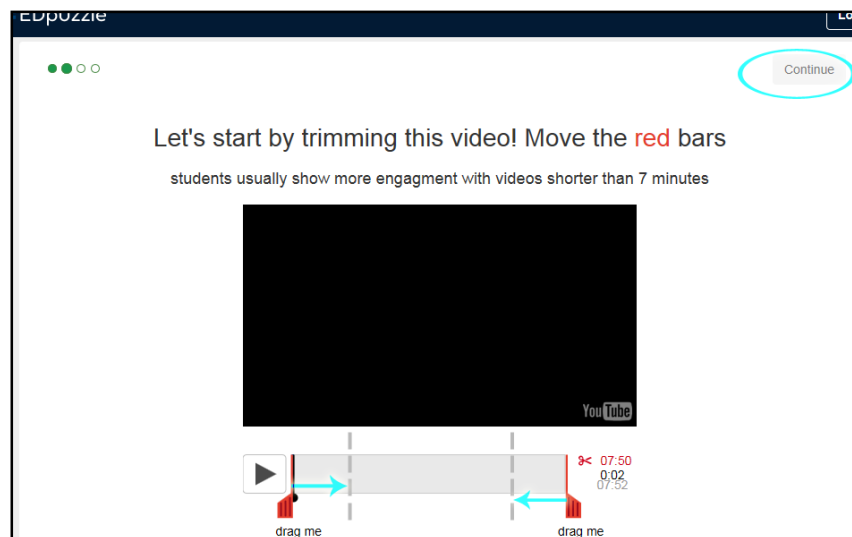

1. Go to [edpuzzle.com](https://edpuzzle.com) and click “Teacher, start now.”

2. On the next screen, click “Start tour.”

3. Click on the red tags and slide them toward each other to shorten the sample video, then click “continue” up at the top.

4. On the next screen, put some text in the sample question box and click “Continue.”

The screenshot shows a video player interface. At the top right, there is a "Continue" button circled in red. The main heading is "Insert a question at any point" with the subtext "make your students think and actively participate during the video lesson". Below this is a video player showing a hand writing on a chalkboard. A text input box with a red border is overlaid on the video, containing a red circle. The video player has a progress bar at the bottom, currently at 01:01 of a 03:24 video. A green question mark icon is positioned below the progress bar.

5. Now you can see a sample of what your results will look like when your students watch the video and answer the questions. Click “Create my first lesson.”

The screenshot shows a table of student performance. At the top right, there is a "Create my first lesson >" button circled in red. The main heading is "And take a close look into what your students are doing" with the subtext "check their understanding and identify where they may be struggling".

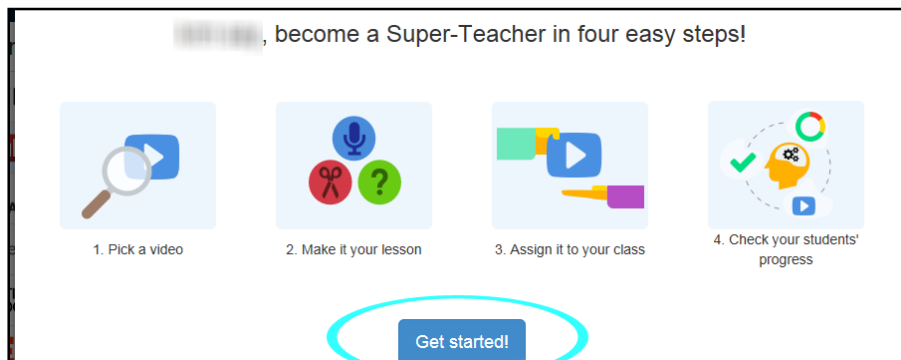

Student	Watched	Grade	Turned In
Beth	✗	0%	-
Daryl	✗	0%	On Time
Rick	✓	0%	On Time
Maggie	✓	100%	Late
Glenn	✓	100%	On Time

- Now you'll be prompted to sign up. You can do so with your google account, with Edmodo, or with your email address.

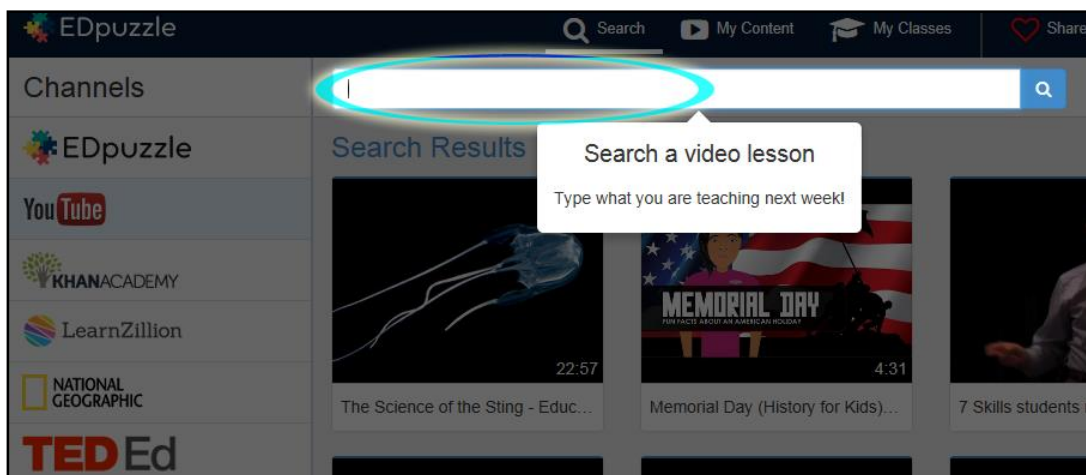

The image shows a 'Sign up as teacher' form. At the top, there are two buttons: 'Sign up with Google' (red) and 'Sign up with Edmodo' (blue). Below these is a horizontal line with 'or' in the center. The form contains several input fields: 'Full Name' with a person icon, 'Email' with an envelope icon, 'Password' with a key icon, and 'Confirm Password' with a key icon. Below the password fields is a dropdown menu for 'Which language do you teach in?' with 'English' selected. At the bottom, there is a blue 'Sign up' button. A small text at the bottom left says 'By signing up, you agree to our [terms of service](#) and [privacy policy](#)'.

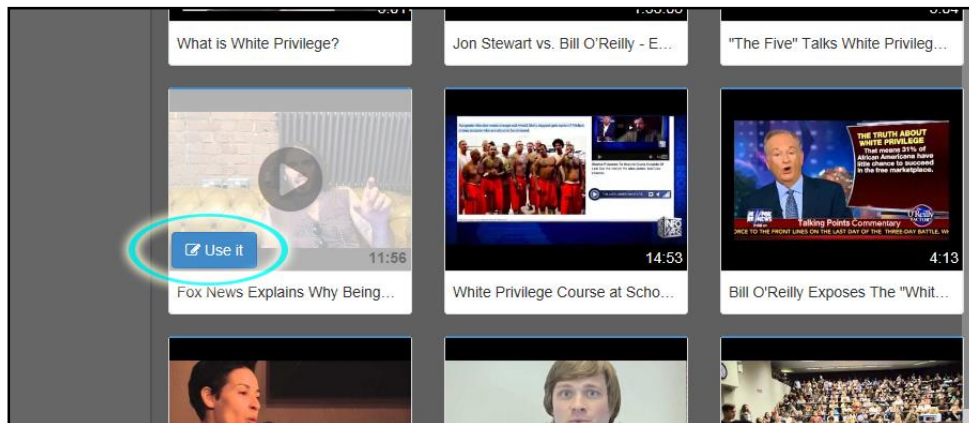

- Click "Get Started" on the next screen.

- You'll be prompted to search for your video. EDpuzzle searches a wide range of video hosting services. Enter your search terms and press Enter.

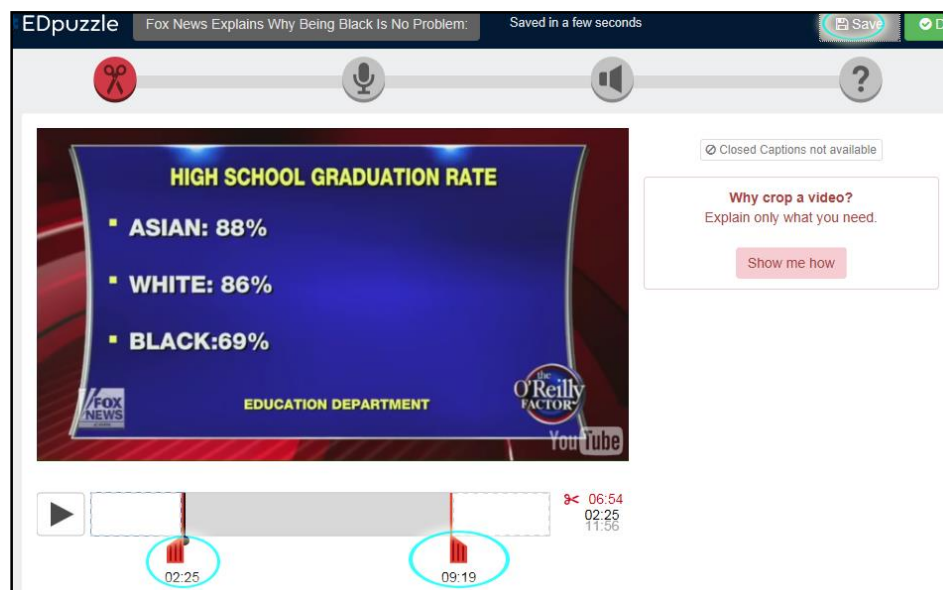

9. Hover over your video and click the blue "Use it" button that pops up.

10. You'll be taken to the editing screen. Click "Funtastic" to begin.

11. Once again, use the little red tabs to shorten your video to whichever length you want. When you have just the piece you want, click the grey "Save" at the top.

12. If you hover over the grey buttons at the top, you will find a blue microphone and a gold megaphone. You can click on the blue one to record your own voice over the whole video segment, or you can click on the gold one to add an introduction in your own words before the video plays.

13. If you click on the grey question mark it will turn green (1) and open up the quiz question menu. Then you can click play (2) and pause when you get to the place you want to add your question or comment. Then you click on the question mark slider (3) and make your choice for an open-ended question (4). Once you put your question in the box, click "Save" (5) and then click the blue "Continue" button that comes up next.

**HIGH SCHOOL GRADUATION RATE**

- **ASIAN: 88%**
- **WHITE: 86%**

14. You also have the options of adding a multiple choice question or your own comment with no response required, using the other tabs. Scroll down to add more possibilities under multiple choice. Multiple choice allows you to assign correct or incorrect to any answer, so this can work as true-false, classic multiple-choice, or multiple-correct. When you finish, click “Save” and then “Continue.” The video will resume and you can follow the same sequence at the next spot you think is good for a question or want to add a comment to.

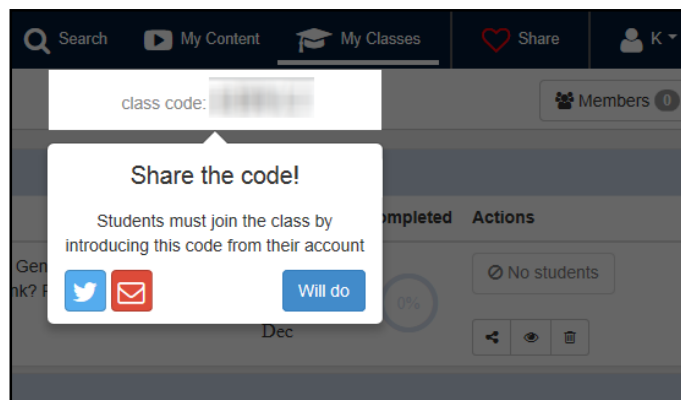

You can also add multiple questions in the same spot of the video by clicking the “plus” (+) button after you write your question instead of clicking “Save.” Then just make your choice of open-ended, multiple-choice, or comment by clicking the tab and filling it out.

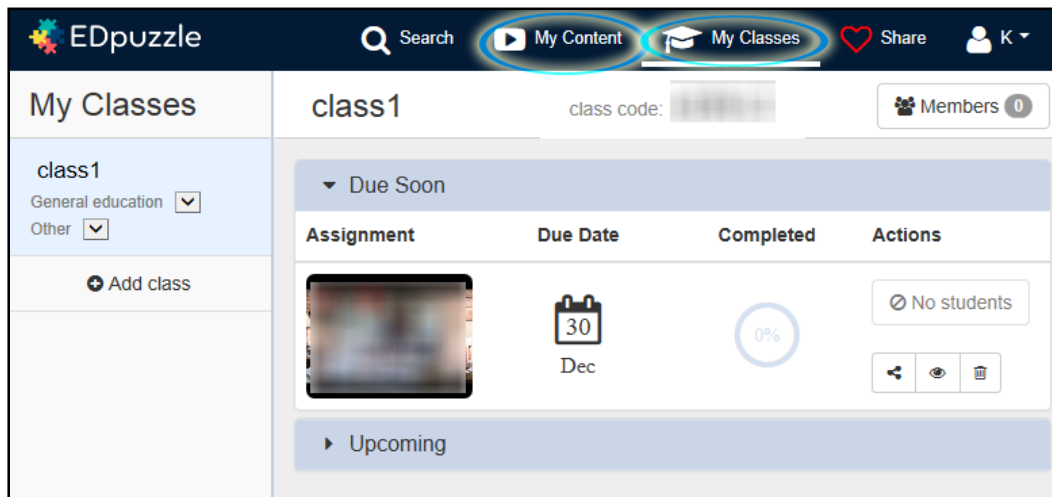

15. When you are finished, click the green “Done” button at the top. You’ll see a pop-up that will look a little confusing, but it all works. The blue speech bubble covers up part of the text, but click just underneath it (1) and type in a name for the class you’ll be teaching this to – and (important!) click the checkmark next to that name. Then check the box next to “prevent skipping” (2) which prevents your students from answering the questions without having played the video, and check the box next to “due date” (3) which allows you to set a due date for anywhere in the future, up to years ahead. Then click “Send.”

16. Now you’ll be taken to your EDpuzzle home screen, and the code for your class will pop up at the top. You will need to provide this code to your students in order for them to participate. You can email it or tweet it from this interface, or simply list it on your D2L.

17. From this homepage you can create a new class. Each class has its own unique code, so a student logging in will only see the videos assigned to that class. You can click on “My Content” and from there assign videos to classes, or edit videos. You can click on “My Classes” to view students’ progress, see how many students have completed the task, and so on. The red heart “Share” link allows you to send an invitation for other teachers to join EDpuzzle. If you are looking for a way to link or embed your lesson, click on “My Content” and then click on the video you want to link or share.

18. A dialogue box will come up – Click “Assign | Share.”

19. Now click “Share.”

20. You can now copy the link or the embed code. Keep in mind that if students do not log in, their answers will not be saved. You probably don't want to provide them with this if it is the first time they are using it unless the assignment is ungraded. Instead, send them to [edpuzzle.com](https://edpuzzle.com) with the code and have them log in.

The screenshot shows the EdPuzzle interface for sharing an assignment. At the top, there are two buttons: "Assign" and "Share", separated by the word "or". Below these buttons is a note: "No need for your colleagues or students to login. Answers won't be saved but they will get immediate feedback anyway!". Underneath the note, there are two sections: "Link" and "Embed Code". The "Link" section contains a text input field with the URL "https://edpuzzle.com/media/557b05a8d7e8499371427df0". The "Embed Code" section contains a text input field with the following code: 

```
<iframe width='470' height='402'  
src='https://edpuzzle.com/embed/m/557b05a8d7e8499371427df0' frameborder='0'  
allowfullscreen></iframe>
```

 To the right of the "Embed Code" field is a dropdown menu set to "Medium". At the bottom of the interface, there are three social media sharing icons: Facebook, Twitter, and Email.
